SUMMARY

Innovative and highly motivated Front-end developer. Seeking to use proven skills in software development, technical writing and leadership to meet business needs.

EXPERIENCE

Circle Lead

May 2022 - PRESENT

AltSchool Africa

- Mentor 9 team members, enabling them to achieve professional growth and personal goals.
- Lead a development team of 5 persons to create web pages, and have their repositories hosted.
- Utilize HTML, CSS, and JavaScript to create responsive landing pages for school projects and assignments.
- Make use of version control applications such as Git to ship and organise codes.

PROJECTS

- [My Portfolio](#): Built and hosted a Portfolio website using React.js and SASS: <https://sarah-daniel.vercel.app/>
- [Tech Newbie](#): A tech community app built with React.js and context API, includes protected routes. Set up with fake userAuthContext using the context API always to carry out a fake authentication.
- [Reader](#): Reader is an app that uses firebase authentication to verify users before signing in and then displays users UI using random user API.
- [Expense Tracker](#): An Expense tracker React app using hooks: useState, useContext, useReducer and the context API.
